Exoblanc *NMN eye cream*

Exoblanc NMN Eye Cream is specially formulated to naturally reduce the appearance of dark circles and under-eye bags. Designed for the delicate eye area, this luxurious cream harnesses the power of Nicotinamide Mononucleotide (NMN) and potent ingredients to deliver exceptional anti-aging and hydrating results.

What is NMN?

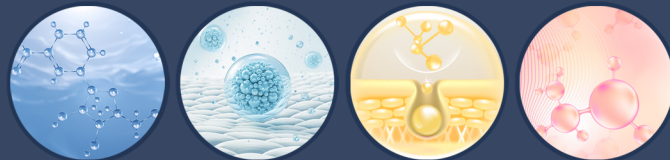

Nicotinamide mononucleotide (NMN) is a nucleotide derived from ribose and nicotinamide. NMN reverses skin aging through several mechanisms:

- 1. Promoting DNA Repair:** Higher NAD⁺ levels help in more efficient DNA repair, reducing damage and skin aging.
- 2. Activating Sirtuins:** Elevated NAD⁺ levels activate sirtuins, essential proteins for cellular health and longevity. They support cell survival, reduce inflammation, and enhance stress resistance, promoting youthful skin.
- 3. Reducing Oxidative Stress:** Boosting antioxidant enzyme activity minimizes skin cell damage, preventing wrinkles and maintaining elasticity.

Highlighted ingredients

- **NMN:** Promotes repair, rejuvenation and combats signs of aging.
- **Exosomes:** Deliver nutrients and boost cellular communication
- **Niacinamide:** Improves skin tone, reduces inflammation, and enhances barrier function.
- **Peptides:** promote collagen production, improving skin elasticity and reducing wrinkles

Embrace the Future of Under eye skincare with NMN

Exoblanc NMN Eye Cream enhances youthful complexion with exceptional purity, visibly firming delicate eye area skin over four weeks of use. **Say goodbye to:**

- Signs of aging
- Dull under-eye bags
- Fine lines
- Dark circles
- Puffiness

Directions for Use

1. Depress the button on the bottom to dispense **Exoblanc NMN Eye Cream**.
2. **Gently apply the cream** around the eye area using the roller.
3. **Lightly roll the applicator** to evenly distribute the cream until fully absorbed.
4. Pat the excess gel gently.

* For best results, use morning and night
